SKILLS

Languages: Python, C, C++, Java
Tools/Platforms: NumPy, Pandas, Seaborn, PostgreSQL, Google Colab, Jupyter Notebook, GitHub
Soft Skills: Problem-Solving, Team Collaboration, Time Management, Self Learning, Leadership.

PROJECTS

AI-Powered Facial Recognition Attendance System | GitHub May' 2026

- Developed an AI-powered attendance system that automates student attendance using real-time facial recognition.
- Implemented Python, OpenCV, NumPy, Pandas, and Face Recognition libraries to perform real-time face detection, identification, and attendance tracking in real-world classroom environments.
- Recognized 20+ registered faces with 95%+ accuracy under controlled classroom conditions for face identification.
- Automated attendance marking to reduce manual effort by approx 50% during classroom attendance sessions.
- Generated 100% digital attendance records for students during regular classroom sessions, improving overall attendance management, record accessibility, and data-tracking efficiency.
- Tech Stack - Python, OpenCV, NumPy, Pandas, Computer Vision, Face Recognition, Machine Learning

Interactive Rainfall Analytics & Visualization Dashboard | GitHub Apr' 2026

- Analyzed rainfall patterns across 117 years (1901–2017) to identify seasonal and yearly variations across India.
- Transformed rainfall data into interactive Power BI dashboards using Power Query and data modeling techniques.
- Visualized 5.92M total rainfall with KPIs, heatmaps, trend charts, and interactive filters for better insights.
- Compared rainfall across 5+ top subdivisions, months, and seasons to highlight regional differences and trends.
- Identified Monsoon as the dominant season (75%) and July as the peak rainfall month for business insights.
- Tech Stack – Power BI, Power Query, DAX, Data Modeling, Data Visualization, and Data Analysis.

Responsive Restaurant Ordering & Management Website | GitHub May' 2024

- Created a responsive restaurant website featuring 6 navigation links and a visually engaging landing page.
- Organized the menu into 5 food categories with 50+ food items, prices, and images for better presentation.
- Enabled an online ordering form with 4 customer input fields for convenient food selection and order submission.
- Customized 15+ UI components including buttons, navigation elements, and content sections using CSS for styling.
- Arranged website elements into clear sections with structured content and user-friendly interface components.
- Tech Stack - HTML, CSS, JavaScript

TRAINING

Data Analytics Essentials with AI: SQL, Python, Power BI, Tableau and Excel | Certificate Jun' 2026 – Jul' 2026

- Gained practical exposure to 5+ analytics tools including SQL, Power BI and Excel through hands-on training.
- Explored datasets using SQL queries and Python for data cleaning and insight generation across practical datasets.
- Produced interactive dashboards in Power BI with 10+ visualizations for data-driven reporting and business insights.
- Applied Excel techniques including 5+ functions and data-analysis methods to organize and interpret datasets.
- Acquired practical knowledge of AI-assisted analytics across 3+ stages: preparation, analysis, and visualization.
- Tech Used - SQL, Python, Power BI, Power Query, DAX, Tableau, Microsoft Excel

CERTIFICATES

- Data Fundamentals| IBM SkillsBuild — Sep' 2026
- Database Management System Part-1| Infosys Springboard — Aug' 2026
- Introduction to Dsa | Coding Tantra — Jan' 2025
- Leadership Fundamentals | Skillera — Aug' 2024

ACHIEVEMENTS

- Earned a 5-Star Python Badge on HackerRank, demonstrating strong Python programming. — Aug' 2025 - Present
- Volunteered as a technical event coordinator, managing logistics for department fests. — Sep' 2024 - Present

EDUCATION

Lovely Professional University — Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; CGPA: 8.4 — Aug' 2024 – Present

Vivekanand International Public School — Chhapra, Bihar
Intermediate; Percentage: 79% — Apr' 2023 – Mar' 2024
